

PC WHOLESALE

Key Challenge

Managing inventory throughout the production cycle to keep track of serialized component parts as well as the finished assembled products

Project Objectives

- Provide a stable environment to support the business needs of production
 - Track service warranty information
-

Why SAP® Solution

- Flexibility
 - Possibility of multiple customizations and calculations for sales order processing
 - Balanced inventory transactions
 - Ease of integration with other applications and Web pages
-

Implementation Highlights

- Implementation took only 3 months
 - 15 users went live the first day
-

Key Benefits

- Flexibility
 - User-friendly interface
 - Integrated end-to-end solution
-

PC Wholesale, provider of hardware solutions based in San Antonio, tailors its solutions to individual customer needs, consistently delivering the best combination of hardware, sales, and technical support available. To manage its warehouse, production, and point-of-sales activities as well as its financial operations, PC Wholesale relies on SAP® software.
